## JOB OPENING: INDUSTRIAL MECHANIC, MILLWRIGHT

Washington Mills Electro Minerals Corporation  
7780 Stanley Avenue, PO Box 1002  
Niagara Falls, Ontario, L2E 6V9

### Company Description

Washington Mills is one of the largest producers of high quality abrasive and fused mineral products in the world. It has facilities throughout the U.S and Europe and serves a global customer base. Its principal business is the fusing of oxide and carbide minerals in electric arc and Acheson furnaces, as well as the grinding and classifying of the minerals into grains and powders. Established in 1868, Washington Mills continues a long history of excellence in supplying raw materials to the abrasive, refractory, ceramic and industrial abrasive markets. Washington Mills offers a comprehensive and competitive benefit package.

### Job Description

Washington Mills is looking to hire an Industrial Mechanic, Millwright in its Niagara Falls, Ontario plant. The job will work directly with and report to the company's Maintenance Supervisor. The Millwright is responsible for maintaining production and quality of the product by ensuring the operation of machinery and mechanical equipment. The position requires a team-orientated attitude and the ability to take instruction and perform related tasks. The position will require daily work to perform corrective and preventative maintenance on furnaces, crushers, overhead cranes, dust collectors and material handling equipment including motors, conveyors and elevators. The ideal candidate will be someone who is mechanically inclined and enjoys figuring out how machinery works and fixing it!

### Essential Functions

- Perform plant machine and equipment repair, mechanical adjustment, servicing, overhaul and installation of plant equipment and machinery
- Perform general maintenance and repair activities in all areas within the plant
- Use tools and manipulative ability to repair, adjust and replace machine parts including bolts, anchors, shafts, drives, gearing, bearings and feed mechanisms
- Troubleshoot mechanical difficulties as they occur
- Perform necessary repair, replacement and installation of air and fluid hydraulic units on furnaces and plant production equipment
- Must be able to read and work from necessary prints, sketches, mechanical lay-outs, blueprints and equipment diagrams; and have the ability to plan or help plan and layout repair or installation work within the ability of a Millwright
- Perform welding and torch work
- Obey all safety, fire and environmental regulations

## Required Skills

- Possess an Ontario Certificate of Qualification for Industrial Mechanic (Millwright)
- Experience in work related to repairs, rebuilding industrial machinery, furnaces, conveyors and bucket elevators is a plus
- Welding

## Compensation/Benefits

- Position will be hourly at current contractual rate with overtime benefits
- Millwrights rotate "on-call", carrying a pager
- Benefits include: prescription drug plan, dental, extended health care, pension, life/AD&D insurance, short and long-term disability, 12 paid holidays, and vacation time
- Personal protective equipment such as safety shoes, safety glasses, hard hats, and gloves
- Laundered coveralls
- Safety Incentives
